Summary

Results-driven Software Developer with expertise in backend and front-end development, specializing in C#, ASP.NET Core, Web API, and jQuery. Experienced in designing and implementing scalable, high-performance solutions while ensuring code quality, maintainability, and efficiency. Adept at problem-solving, debugging, and optimizing applications to enhance user experience and system reliability. Passionate about continuous learning and adopting best practices to deliver robust software solutions.

Experience

alkapida.com

Backend Developer

Istanbul

September 2023 - Present

- Designing scalable and maintainable software solutions using .NET Core, with a strong focus on efficient architectures and multi-layered structures.
- Developing solid backend solutions and user-friendly desktop applications with C#, OOP, Entity Framework, .NET Core, and SQL.
- Enhancing web application performance and usability by leveraging Web API, MVC, and jQuery.
- Integrating RFID solutions to improve automation and real-time data processing.
- Optimizing data management and caching strategies by building .NET applications that interact with SSMS and Redis.
- Committed to clean code, maintainability, and best practices, while continuously expanding technical expertise.

Skills

Technical: C#, .NET Core, ASP.NET Core, Web API, Entity Framework, Windows Forms, SQL, SSMS, Redis, JavaScript, jQuery, MVC, HTML, CSS, Bootstrap, Git, RFID Solutions, Microsoft Azure, Software Architecture (Multi-layered, Clean Code), Performance Optimization

Language: Intermediate Proficiency in English

Certificates: Software Expertise - MCSD, Techcareer ASP.Net Core MVC Bootcamp

Education

techcareer.net

ASP.Net Core MVC Bootcamp

August 2023 - September 2023

Infotech Academy

Software Specialist Course - MCSD

November 2022 - May 2023

Kastamonu University

Associate Degree, Computer Programming

September 2019 - June 2021
